## Back-page Worksheet: Household Roster and Work Status

At the start of the interview, read to the respondent: Please tell me the names and ages of all household members, that is all people—regardless of blood relationship—who stay or live permanently in the same residence, who share their main meals, and who cooperate together to fulfill their other basic needs. This includes whomever the household head thinks it should include. A household may have just one person. Do not forget absent members or newborns. Do not count live-in domestic servants nor lodgers.

Write the names and ages all household members. For each member 14-years-old or older, ask whether he/she did any work in the past week (not including household chores).

See the Interview Guide for more detail about the definitions of work, past week, and household member.

Count the number of household members, write it next to “Household size:” in the scorecard header, and mark the corresponding response to Question 1. Count the number of household members who work, and mark the response for Question 2.

Name of household member	Age	If <name> is 14 or older, then ask: In the past week, did <name> do any work? (not counting household chores)
